Spokane Valley Office Building Returns to Original Purpose
Whipple Consulting Engineers Moves into old Opportunity Engineering Space

SPOKANE VALLEY, WA— As the neighborhood known as, ‘Opportunity’ developed in the early twentieth century, Opportunity Engineering opened their doors for the first time near the corner of Pines Road and Sprague Avenue in Spokane Valley.

In December of 2017, those doors opened again, this time under a new sign reading, ‘Whipple Consulting Engineers.’

In the years between, the building that originally served an engineering firm saw several businesses come and go. KZUN Radio, a florist, a nightclub, an arcade, and a bakery are just a few of the trades that have inhabited 21 S. Pines.

--more--

The journey taking the site back to it's original purpose was no simple feat. Whipple Consulting Engineers took on a 6-month remodel, renovating nearly every square inch of the building that, nearly a century of updating later, would no longer be recognizable to the founders of Opportunity Engineering.

After twelve years and a lot of growth in WCE's old location on Sullivan Rd., the company was looking to find a place that fit more comfortably. Moving into an office with a history of Engineering in Spokane Valley has turned into the perfect fit.

Whipple Consulting Engineers is an established consulting firm providing professional services publicly and privately for over 13 years. Based out of Spokane Valley, Washington, WCE provides land surveying, civil, structural and traffic engineering, land planning and landscape architectural services to the architectural and land development communities of the western United States.

For more information about WCE and their scope of work, please call Whipple Consulting Engineers at 509-893-2617 or visit WhippleCE.com.
