Two Whipple Consulting Engineers Employees Gain Licensure

SPOKANE VALLEY, WA— One Engineer in Training and one Land Surveyor in Training employed at Whipple Consulting Engineers have become Licensed as a Professional Engineer and a Professional Land Surveyor following releases by the National Council of Examiners for Engineering and Surveying of the results of their respective exams.

Justin Penner, P.E. and Brett Griffith, P.L.S. received word mid-December of their licensure. According to the National Council of Examiners for Engineering and Surveying:

Professional licensure protects the public by enforcing standards that restrict practice to qualified individuals who have met specific qualifications in education, work experience, and exams.

--more--

The road to professional licensure lengthy and difficult. It requires fulfilling the appropriate level of education, an additional period of experience under a practicing P.E. or P.L.S., and a passing score on multiple historically difficult examinations.

Whipple Consulting Engineers is an established consulting firm providing professional services publicly and privately for over 16 years. Based out of Spokane Valley, Washington, WCE provides civil, structural and traffic engineering, land planning and landscape architectural services to the architectural and land development communities of the western United States.

For more information about WCE and their scope of work, please call Whipple Consulting Engineers at 509-893-2617 or visit WhippleCE.com.
